## FUTURE-PROOFED PERFORMANCE FOR THE BIKING MOVEMENT

*“Many things have happened since we started our journey over 60 years ago - from a unique rim tape solution to being the leading European bicycle component manufacturer we are today. We proudly stand at the frontline with our high-tech front lights and our new thinking when it comes to grip solutions and materials. All designs and products are made and produced in our modern production facilities on the west-coast of Finland.*

*The climate change is happening and for us sustainability is one of our important cornerstones. To make this topic real, and not just something we speak about, we have also signed the Climate commitment with Shift Cycling Culture as well as other local commitments. We want to contribute to the future and make sustainable bike components that lasts season after season.*

*We are on a Grand Tour journey to becoming carbon neutral by 2035 and committed contributing to make bikes more sustainable through our products. The partnership with our customers and suppliers is a key enabler for the success!*

*We are happy that you make the conscious choice to join this journey with us. Let’s grow the cycling community by making cycling more comfortable, safe, sustainable and stylish!”*

Kind regards,  
**Dan Liljeqvist**  
CEO

## WHERE SUCCESS IS BORN

Herrmans Bike Components is a success story from Finland's friendly and entrepreneurially-spirited West Coast. **Starting with the production of our very first bike component in 1959, we believed in the creative power of innovation.** Our founder, Bernhard Herrmans, realized the potential of the very first product, the rim tape, and had the foresight to automatize production early on. This entrepreneurial mindset remains strong in the company to this day. Herrmans Bike Components has now been thriving for more than 60 years and possesses a wide variety of cutting-edge products in its premium product portfolio.

## HIGH-TECH EXPERTISE

**Today we are proud to be a modern and innovative high-tech power house that offers world class solutions for the bike industry.** We believe that our success is derived not only from one factor but the sum of many things we have done right over the years. However, if we had to choose, our R&D department and the creative work culture we have been fostering for decades are the main contributors to our success. Innovation has always been the DNA of Herrmans Bike Components Ltd. **Through development and a curious mindset, we have gained extensive know-how in plastic technology, optics and light patterns.** We have our own in-house lab for engineers, featuring a vibration testing lab, light lab, electronics lab, salt spray lab and CT scanner where we develop and test our latest products.

## BROAD PRODUCT RANGE

**We design and manufacture lights, grips, guards, reflectors and rim tapes of premium quality and take pride in co-creating many of our products with our customers.** In this catalogue you will find our latest product innovations. If you are looking for a specific product category or item, or just want to look up a detail, you will find that piece of interesting information on our **web site [www.herrmans.eu](http://www.herrmans.eu)**

Experience our company's vision and mission in action - watch our corporate video.

**Vision**

Our vision is to contribute to the worldwide biking movement by being the most valued partner with the most appreciated bike components

**Mission**

Our mission is to develop innovative & sustainable bike components through collaboration, offering state of the art manufacturing, and servicing our customers wholeheartedly through the journey

**PASSION, PARTNERSHIP & PROFESSIONALISM ARE OUR DRIVERS**

**Passion for more biking**

Our customers make biking possible for cyclists all over the world. We are dedicated to contributing to safe, comfortable, enjoyable and sustainable biking by developing and manufacturing premium bike components. We strongly believe that our shared vision will contribute to increased biking, which will improve the health of both the people and the planet.

**Premium partnership**

Together is the key. The best bikes and the best biking experience is achieved through collaboration, with the end-user in mind. Our service-mindedness, extensive knowledge and experience in the bike industry are essential parts of our heritage.

**Professional performance**

It is important for us to get the job done. We take pride in what we do, holding ourselves accountable for the results. We value strong leadership and great teamwork, we nurture the positive “never-give-up” and curious, entrepreneurial attitude that has been the company’s birthright for over 60 year.

# FRONT LIGHTS

TO SEE AND TO BE SEEN

## LIGHT TECH BASICS – HOW TO COMPARE AND CHOOSE FRONT LIGHTS?

When choosing a bike light, the first thing that comes to mind is how bright the light should be. Sounds simple enough, but you want to compare different lights objectively to find the optimal light, which will give the best value for money.

### LUMEN AND LUX, INTERPRETING LIGHT VALUES

All LED bike lights are brightest when just turned on and shine less bright when they get hot. Depending on the construction and cooling, the output decreases gradually until a stable level is reached.

**We always mention the stable value**, measured after 30 minutes, not only the initial higher value that typically only lasts a few minutes.

#### Front light values are given in lumens and lux:

**Lumen = how much visible light is emitted** from a light source. The real perceived light intensity will however depend on the direction and the area onto which it is projected.

**Lux = how bright a given surface will be.** A measure of how much luminous flux is spread over a given area ( $1 \text{ lx} = 1 \text{ lm/m}^2$ ). The Lux value is usually measured on a vertical screen at 10m distance (as per the German type approval measurement). Lux is also a measure of how well the optics in the bike light uses the available light (lumens).

**Candela** (used for rear lights) indicates the **visible intensity** in a given direction, from the light source.

In real life, the bike light will not hit the road vertically, but diagonally, so the light is distributed on a bigger area. Therefore, it's important to also look at the actual light patterns of each bike light.

### FINNISH-MADE LIGHT EXCELLENCE

Our engineering and production teams in Finland put great emphasis on the design and technology of our lights, as well as on our excellent manufacturing quality, to bring you the best possible light experience to the right price.

## WHAT DEFINES A GOOD LIGHT PATTERN?

**With efficient optic design, a very generous light pattern with great range can be reached, even with lower lux values.** Comparing different light specifications and patterns makes it possible to choose the very best bike light for your needs.

**The optimal range and shape of the light pattern.** For road cycling you want to illuminate the road far ahead, as the ride will be quite fast, straight, and stable, so a longer, narrower light pattern is preferable.

A wider light pattern is a good choice for bikes riding on country roads, when you also want to see to the side of the road. Same goes for riding on trails in the forest or mountains. With winding paths, the ride is less stable and straight, so a wide light pattern with soft edges helps to see the direction and any obstacles clearly and safely.

**Easy on the eyes.** The light distribution should be even, with as few disturbing lines or irregularities as possible, to give a “calm” light that illuminates the road ahead safely. The light should be white only, to be as bright as possible, without any blue or yellow color disturbances from the LEDs.

**No dazzle cut-off line.** A bike light with a sharp cut-off line is easier to set to the right angle, to see as far as possible without dazzling oncoming traffic. Especially with higher lux and lumen values the cut-off line must be sharp.

# REAR LIGHTS

BE NOTICEABLE

**We believe in creating rear lights that are compatible with different kinds of bikes, whether battery, dynamo or e-bike.** Fulfilling a number of European road traffic regulations, our rear lights are durable and modern with fantastic light output thanks to our exclusive light guide technology. When you need a custom-made solution for your next bike model, our in-house high-tech lighting expertise gives us the expertise to offer you the innovation you need.

### WHY DO WE NEED A REAR LIGHT?

Rear lights work incredibly well for safety purposes. They display the rear edge of the bike that allows other riders and car drivers to properly measure the shape and size of the vehicle in front of them. In addition, they allow a driver to see the other vehicles on the road in harsh weather conditions like rain or snow.

**We have a broad rear light range to offer and have been inspired from the automobile industry in both design and function.**

# GRIPS

FREEDOM IN MOVEMENT

**Grips are the first part of the bike the rider touches in the shop.** They transmit the first feel of the bike to the consumer. After the saddle and the pedals, the grip is the third part of the bicycle which is in direct contact with the cyclist. The choice of grips is not only a question of ergonomics, comfort and safety, but also look and design are equally important. **Besides fulfilling all European regulations the Herrmans TPE grips are all PAH, latex, natural rubber and Phthalate-free.**

Herrmans offers a number of adjustable grips with locking systems. In the comfort range we have city & trekking grips and from the active range you will find all our MTB grips. In the ergonomic range we offer comfortable grips as well as safe kids grips.

## THE ERGONOMICS OF RIDING

### CITY RIDING POSITION

back is bent at approx. 80° angle. 70% of weight is placed on the saddle, 20% on the pedals and 10% on the handlebar. Grips for a relaxed riding style emphasizing comfort

### TREKKING RIDING POSITION

back is bent at approx 70° angle. 50% of weight is placed on the saddle, 25% on the pedals and 25% on the handlebar. Grips for a universal riding style releasing pressure from back, spine and backside

### MTB RIDING POSITION

back is bent at approx. 45° angle. 10% of weight is placed on the saddle, 70% on the pedals and 20% on the handlebar. Grips for a sporty riding style maximizing power transfer

### PREVENTING CARPAL TUNNEL SYNDROME

HERRMANS® ergonomic grips are wing-shaped giving an optimized riding angle for preventing Carpal Tunnel Syndrome

### RELEASING PRESSURE FROM ULNAR NERVE

The ergonomic grips also provide an optimized fit for the palm – releasing pressure from Ulnar Nerve

# SUSTAINABILITY

MORE THAN JUST CO<sub>2</sub>

## SUSTAINABILITY AT HERRMANS ...IS MORE THAN JUST OUR CARBON FOOTPRINT

Conducting sustainable business is one of our most important strategic choices. We see sustainability as prerequisite for maintaining our competitive advantage, so the sustainability aspect is integrated in all our main projects and “must win battles”, as we like to put it.

## WE USE THE TRIPLE BOTTOM LINE AS OUR BASIS, MEANING WE FOCUS ON 3 TOPICS: PEOPLE, PLANET AND PROFIT.

It's about making Conscious Choices in everything we do, taking responsible action to futureproof our business. It means prioritizing the wellbeing of employees, customers, and the community, while doing our part for the environment and making sure that also our profit is healthy and sustainable in the long run.

## CARING FOR OUR STAFF AND CONTRIBUTING TO THE BIKING MOVEMENT

We take care of our People by making sure they thrive and grow working at Herrmans, thereby creating the base for great products and wholehearted service. It's a privilege to be part of the bike industry, which directly contributes to better health and wellbeing amongst the people who use our products.

## CARBON NEUTRAL ALL 3 SCOPES BY 2035

For the Planet, we believe that carbon footprint management is an essential part of responsible operations. We track and measure our carbon footprint and take measures to reduce it. Carbon footprint consists of 3 scopes, and Herrmans is already close to zero on the compulsory scope 1 and 2. Scope 3 is very important as it comprises raw materials and transportation, so this is where the biggest impact lies in most manufacturing industries.

We want to make the often-difficult changes that make the real difference, and we therefore set the ambitious goal to become a Carbon Neutral company, all 3 scopes, by 2035.

## PROFIT – FUTURE-PROOFING OUR BUSINESS ENSURING PROFITABLE GROWTH

We aim to make conscious and profitable investments long-term. We have a clear strategy of investing consciously in sustainable collaborations and projects, considering all 3 Ps, identifying sustainable opportunities and innovations.

# RIMTAPES

FOR THE PRESSURE

The rimpape, created to prevent spokes from making holes in the inner bike tire, was the first product in the Herrmans product range and introduced on the market as early as 1959. Today Herrmans is the leading rim tape manufacturer in the world with a collection that encompasses several levels of pressure requirements and different types of wheels.

We offer blue **HPA+** with Wing Technology for easy mounting and perfect positioning on rims from 25 mm and upwards. It stays in place thanks to its thin, light and flexible profile. Made of PVC, max pressure 6 bar/87 psi.

Our **HPP** with W-Tech is extremely light and has a very high-pressure resistance without losing rigidity. Made out of polyurethane, max pressure 8 bar/116 psi.

We also provide a blue **HPM** rim tape with improved pinch resistance. It is made of PVC and can withstand a max pressure of 6 bar/87 psi.

#### FOR THE PRESSURE

- **Double-walled rims:**  
Assembly example for double-walled rims

- **Single-walled rims:**  
Assembly example for single-walled rims

- **Presta:**  
Rim tapes are available with Presta 7 mm valve hole (also known as Sclaverand or French valve)

- **Improved pinch resistance:**  
The Rimpape formulas are constantly being improved, for instance the HPM Rimpape offers 60% improved pinch resistance against i.e. spokes

- **W-Tech:**  
Enhanced flexibility for easy mounting, yet retaining rigidity in the center for high pressure protection.

# GUARDS

MODERN AND SLEEK DESIGN

Chainguards have been in the Herrmans product portfolio for almost 35 years and we have been working with injection moulding for even longer, giving us extensive experience in material features, quality, production techniques and design. Chainguards not only fulfil a practical function, they are also a key design element on the bicycle. Lightweight, sporty, adjustable, modern or classic, the Herrmans chainguard range fits various bikes and crank sets, available both for standard bikes and e-bikes. We have also broadened our guard range with a **Freewheeler Spoke protector, made of recycled ABS.**

- **Durable:**  
The chainguards are made of durable, flexible impact resistant plastic – made to endure the hot summers in Southern Europe and the cold winters in Scandinavia

- **Open for front derailleur:**  
Chain guards also available with front derailleur opening

- **For various chain wheels:**  
Chain guards are available for 33, 38, 42 – 44, 46 and 48 teeth chain wheels and also for single and triple chain wheels

- **Adjustable:**  
Chain guards are also available with adjustable length for fixation between 325 – 440 mm.

- **UV-resistant:**  
The chain guards are made from UV-resistant plastics

## SPOKE PROTECTOR FREEWHEELER

<b>Color</b>	Black

### RAW MATERIAL RESEARCH AND RECYCLING

We want to make the often-difficult changes that make the real difference, and we therefore set the ambitious goal to become a Carbon Neutral company, all 3 scopes, by 2035.

This means we have to recycle more of our raw materials, find new biobased or recyclable material options and be efficient in all ways possible. We are doing extensive research to find ways to use greener materials that maintain the same quality and characteristics and can be used in serial production. We already have chain guard Fuse and spoke protector Freewheeler that are made of recycled ABS plastic, with a 90% lower carbon footprint than virgin ABS. Other sustainable novelties are in the pipeline.

We are already regrinding several types of raw material waste and feeding the reground material directly back into the injection molding machines. This year we are investing in new grinders, making savings up to 450 t CO2 e. eq per year possible, which is a massive improvement, which will lower the carbon footprint of our operations. The end goal is to offer bike components with an ever-lower carbon footprint, that strongly appeal to today's conscious customers, all while maintaining our excellent price-quality ratio and attractive design.

*Herrmans' new Freewheeler spoke protector and Chainguard Fuse offers you a product made from a recycled raw material called ABS, that reduces greenhouse gas emissions by around 90%. Other sustainable novelties are in the pipeline.*

**Sari Noromies**  
Operational Excellence & Sustainability Developer

### Fuse Chainguard - a novel concept for the future

NEW

Herrmans new chainguard has a lightweight feel, available as matte with distinct glossy surface areas. The new customizable chainguard is made of **durable, flexible and UV-resistant material**. Fast snap on front fitting assembly with no visible screws for normal bikes and e-bike systems such as Bosch, Shimano, Yamaha and Bafang.

### CHAINGUARD FUSE 38

NEW

Length	325 - 440 mm
Diameter	125 mm
Chainwheel Teeth	38 Teeth
Color	Black

### CHAINGUARD FUSE 42-44

NEW

Length	325 - 440 mm
Diameter	125 mm
Chainwheel Teeth	42 - 44 Teeth
Color	Black

*The chainguard consists of two separate parts, the chain ring and the chain cover tail. These two parts combined and fused together form a single entity called The Chainguard Fuse. As separate parts, the modularity and customizability awaken!*

**Ronnie Mattsson, Project Lead**

# REFLECTORS

BE VISIBLE

Herrmans is the leading bike reflector manufacturer in Europe, dedicated to producing approved bike reflectors in accordance with the many different European homologations, even the demanding E IV A. We also manufacture approved bicycle reflectors for China and India. Our product range covers spoke, front and rear reflectors, and thanks to many different bracket options, they can be fitted on many types of bicycles.

### LIGHTWEIGHT SAFETY INSURANCE

- **Front reflectors:** available in different versions to cover all European countries. HERRMANS® FR-1 and FR-7 front reflector models are approved in all European countries. FR-7 covers also China and India.

- **Rear reflectors:** available in different versions to cover all European countries. HERRMANS® BR-7 and BR-8 rear reflector models are approved in all European countries. BR-12 covers France, Germany, Switzerland, Austria, Holland, Denmark and Norway plus southern Europe. BR-13 covers France, Germany, Switzerland, Austria, Holland, Denmark and Norway plus southern Europe. BR-7 covers also China and India.

- **Spoke reflectors:** available in different versions to cover all European countries. HERRMANS® ER-11 Yellow covers all Nordic countries, Benelux and France plus southern Europe, China and India. ER-11 Clear covers the United Kingdom. ER-8P covers Germany, Switzerland, Austria, Holland, Denmark and Norway plus southern Europe.

# AFTER MARKET

WHERE OUR PRODUCTS COME TO LIFE

We value our Finnish heritage, never compromising on sustainability, safety and quality. Our After Market range offers you an innovative, environmentally friendly packaging solution for the products we create. Including lights, grips, guards, reflectors and rimp tapes.

The mark of responsible forestry

Our After Market packages are produced locally in Finland, only a stone throw away from our factory. Packaging material is chosen with great care, from responsible forestry, verified with FSC-certification.

Helpful information can be easily accessed by scanning the QR code that you find on all our packages.

After-Market

Get a behind-the-scenes look of the After Market range at Herrmans, accessible by scanning the code

Our grips are fastened on plastic plugs, made from 100% recyclable, bio-based thermoplastic. Once the package is no longer needed, you can feel confident in disposing the package. Every package is 100% recyclable and made with fully biodegradable ink.

It is sustainable. It is functional. It is made for the future.

MADE IN FINLAND

**Please note!**

Not all of the following products are available in all markets.  
During constant improvement specifications and design are changing.  
All values are nominal values.  
Illustrations do not necessarily show the design of every version.  
Some features are version specific.
